

PRESS RELEASE, May 2020

Golden Omega's facility obtains the NSF International GMP certification.

The Chilean leading manufacturer of Omega-3 concentrates, Golden Omega, has been certified by NSF International in the compliance of the cGMP for Dietary Supplements and the cGMP, Hazard Analysis and Risk Based Preventive Controls for Human Food.

NSF International, one of the most respected independent certification organizations worldwide, has assessed and confirmed compliance of Golden Omega production processes and quality assurance system to NSF GMP Registration Program Requirements of NSF/ANSI 173, Section 8 which includes FSMA and cGMP for Dietary Supplements (21CFR111) and for human food (21CFR117). This GMP registration means that Golden Omega meets and exceeds the most stringent safety and quality requirements for the food and nutraceutical industries, and government agencies.

"It was a great satisfaction in validating that our operation was in adherence to the international food safety regulations and good manufacturing practices. This accomplishment is the result of the commitment and passion that we place in everything we do. The NSF cGMP certification is the perfect complement to our state-of-the-art facility and patented concentration and purification technologies that allow us to offer products of the highest quality and purity.", said Jorge Brahm, Managing Director of Golden Omega.

"We decided to obtain this certification for the confidence and trust it brings to our customers, the commercial chain and the regulatory agencies worldwide. It is also a reassurance for the final consumers of our products", explained Claudio Aracena, Commercial Director of Golden Omega.

Golden Omega won an "A", the highest grade in a manufacturing facility inspection of NSF International, that let the company be listed in the GMP system register. This impartial review will be done year by year to further ensure our ongoing commitment to product excellence.

ABOUT GOLDEN OMEGA

Golden Omega is a Chilean Company focused on producing high quality Omega 3 concentrates up to 75% of EPA and DHA obtained from fish oil. Golden Omega's production facilities are registered, authorized, and regularly inspected by US FDA and EU representatives.

Its location in Northern Chile, close to the raw material source, guarantees an assured supply of the best fish oil available worldwide, as well as freshness and quality.
