

PRESS RELEASE APRIL 28, 2021.

## Golden Omega Norway achieves Friend of the Sea and Dolphin-Safe certifications for GOTab, direct compressible Omega-3 powders for tableting.

The certifications, granted by Friend of the Sea and the Earth Island Institute assure the use of sustainable resources and compliance with the Dolphin-Safe requirements.

Golden Omega Norway AS, a subsidiary of Golden Omega SA has been successfully audited by the Friend of the Sea organization and obtained the Friend of the Sea and the Dolphin-Safe certifications for all its GOTab powders.

Friend of the Sea is a project of the World Sustainability Organization (WSO), providing certification of products and services which respect the marine habitat and aquatic species.

The Dolphin-Safe project has been the precursor of all sustainable seafood programs and standards. Started by the Earth Island Institute ([www.earthisland.org](http://www.earthisland.org)) in 1990, the Dolphin-Safe project has saved millions of dolphins from being killed in tuna nets.

Due to its strategic and unique location in the middle of the richest fishing grounds for anchovy in the world, in the South Pacific Ocean, Golden Omega SA has full control and traceability of the fish oil that is utilized in the production of GOTab. *"After becoming part of Golden Omega, it was a natural step to certify our GOTab Omega-3 compressible powders for Friend of the Sea and Dolphin-Safe. This will be another great value-adding point for our clients who are using this powder for their human and pet supplement products,* commented Tina Vestland, Managing Director of Golden Omega Norway.

*"Our company has a permanent commitment to protecting the environment and the sustainability of resources, which we are reaffirming by joining this certification for our GOTab powders. This is a natural consequence of using in all our Omega-3 concentrates only anchovy from Chilean and Peruvian waters, from Friend of*

*the Sea certified sources"* commented Jorge Brahm, Managing Director of Golden Omega SA.

Companies that are using the GOTab powders into their products interested in using the Friend of the Sea or Dolphin-Safe logos should contact the Friend of the Sea organization.

### ABOUT GOLDEN OMEGA NORWAY

Golden Omega Norway AS, a subsidiary of the Chilean Company Golden Omega SA, produce GOTab, high quality Omega-3 direct compressible powders for tablet formulations for human and pet dietary supplements, utilizing a proprietary technology. These powders exclusively contain Omega-3 concentrates produced by Golden Omega SA in its state-of-the-art production facility located in Northern Chile, close to the raw material source. This assures supply of the best fish oil available worldwide, as well as guaranteed freshness and quality.
